Tech Survey

Ralston Public Schools

Overview

Ralston Public Schools is a small, urban district surrounding by Omaha Public Schools. Roughly 33% of their student population opts in. A district snapshot can be found [here](#).

Philosophy

The district does not have a specific technology philosophy and, in fact, technology is lumped into the facilities line of their [strategic plan](#).

Technology

The technology throughout the district is a bit disparate and haphazard. More information on technology available to staff and students can be found [here](#).

Technology In Action

Staff

At the start of the 2018-2019 school year, all teaching staff were given a current [model](#) MacBook Air. These computers are still in use.

Students

Prior to the COVID pandemic, students did not have access to 1-to-1 technology. During the summer of 2020, all middle and high school students were issued a Chromebook.

Support

The middle and high schools each have a dedicated technology para, however, no specific training is require, so support is often spotty.

Miscellaneous

Other forms of technology, such as smart boards, AppleTVs, iPads, document cameras, and projectors, are available but supplies are limited and teachers have to know to ask.

Teacher & Student Voices

Admin

"There is not clear direction on what tech tools are supported and if purchasing school-wide licenses is an acceptable use of school funds. This also creates uneven access between buildings."

Teachers

"Training on the technology we DO have is lacking as is the support for any issues we may encounter using it. People also have to know to ASK for anything unusual because there is almost always money for it."

Students

"Teachers don't know how to use the technology we have. I stopped bringing my Chromebook to school because I never used it."
